

OUR FIRST MILLION

LORI'S VOICE

February 2020

We want to share with you and celebrate our million-dollar milestone. Since we began a few short years ago we have touched the lives of hundreds of families with Special Needs children and have given grants totaling one million dollars.

Although we started small, we have grown substantially the last few years. Of course such growth and such a milestone would not be possible without your support and generous donations and for that we are very grateful. We are proud of hitting the million dollar mark but remain mindful of the unmet needs that still exist in our communities.

Our assistance has taken on

many forms, for example we have helped put 56 handicap accessible vans on the road, helped pay for therapy for 95 kids and 97 wheelchairs, bikes and walkers. We have purchased 32 computers and assisted with 17 home construction projects add that to the hundreds of kids we have helped with travel, camp, lifts, coats and other specialized equipment. I cannot overstate the impact this has had on these families – a special needs child is a family affair in so many ways, affecting not just the primary care giver but his or her siblings as well. We help ease each family's stress and financial burden but we are far from done with our mission. The first million is the toughest; please support our all-volunteer organization as we are busy at work on the second million right now.

With a grateful heart,

Lori
